

eCOMMERCE INTELLIGENCE

Turn messy exports into operational intelligence.

Import → Analyze → Export insights from Shopify, WooCommerce, or spreadsheets.

EXECUTIVE OVERVIEW · DEMO

REVENUE

12-month revenue trend

Deterministic analytics · No black-box AI

THE PROBLEM

Your data is everywhere. Your insights aren't.

Spreadsheets everywhere

Products, sales, and inventory live in disconnected exports.

Profit leaks go unnoticed

Low margins, discounts, and pricing gaps compound quietly.

Inventory risk builds up

Dead stock, overstock, and stockouts hide in plain sight.

No time for complex BI

Teams need answers today — not a 6-week analytics project.

HOW IT WORKS

Three steps. One operational picture.

01 **Upload business data**

CSV, XLSX, Shopify & WooCommerce exports.

02 **Run CommerceFlow analysis**

Inventory risk, profit leakage, product intelligence.

03 **Explore & export reports**

Dashboards, alerts, and executive Excel workbooks.

KEY CAPABILITIES

Built for ops & finance teams.

 **Inventory Intelligence**

 **Profit Leakage Detection**

 **Executive Dashboards**

 **Alerts & Recommendations**

 **CSV/XLSX Import Engine**

 **Enterprise Excel Reporting**

READY TO SEE IT?

Turn messy eCommerce exports into operational intelligence.

CSV/XLSX

Profit Leakage

Inventory Intel

Executive Excel

100k+ records tested

Run Analysis →
